SZA200-H2O Leak Detection Probes, Part Number 1010-H2O

**OPERATION:** The Flair Water Leak Detection Annunciator is an attractive , low cost alarm that can be used to detect water leaks in homes, apartments, businesses, computer rooms and other facilities where damage can occur due to water leaks. Connect multiple Leak Detection Probes to a single input loop to monitor large areas. The alarm LEDs and built in sounder will annunciate an alarm. The on-board 24 VDC SPDT relay can be connected to a main shut-off valve to stop water flow until the leak can be repaired, saving much down time and money.
