ELECTRONICS

World Class  
Security Systems

# FLAIR ELECTRONICS

Thank you for purchasing from Flair Electronics. Below are some of the markets that we are servicing. Please go to our updated website to see the products available for these markets.

## RESIDENTIAL & COMMERCIAL

Flair has the widest range of magnetic contacts on the market so you can tailor a home or business security system for exactly what your customer needs. Our other sensors include intrusion detection, perimeter security, water leak detection, and panic alarms.

## ASSISTED LIVING & HEALTHCARE

Our wired and wireless nurse call systems are customizable to any facility with a variety of sizes and call devices such as pull cords, pendants, push buttons, fall pads, etc. Pager and iPhone notification systems as well as performance reporting are also available. Flexible designs mean you can add on features as the future demands.

## MILITARY & GOVERNMENT

Our made in the U.S., Level I and Level II triple bias magnetic contacts are used to protect the most sensitive military and government facilities. In addition, our perimeter security and panic alarm systems are used by military bases, court rooms and social service centers around the US.

## K-12 SCHOOLS

We need to protect our most vulnerable and important community members. Our wired and wireless annunciators can be used to monitor perimeter doors and gates or panic alarms around the school. When time is critical these systems provide easy to understand critical information to prevent problems and save lives.
