

MILITARY & GOVERNMENT

BORDER CROSSING

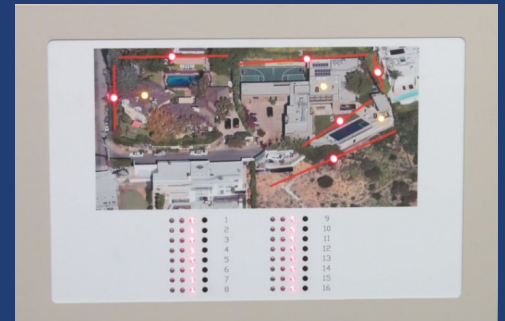

Whether it is a major border like the Southern border or the border fence to your city carport, our fence vibration sensors are scalable and economical. They can be tuned to any fence, old or new, to catch intruders before they get in.

VIB200: Vibration Fence Sensor

PERIMETER SECURITY

Graphic annunciators are simple and super effective. They show guards and life safety personnel door status at a glance. There is no need to log into a computer or fiddle with an LCD screen, our annunciators call attention to any security breach with a sounder and flashing red LED. Military bases, city jails, county courtrooms, county social service centers are all currently using these products.

Graphic Annunciator

INTRUSION DETECTION

There are big threats out there and our government and military facilities need to have the best, most difficult to defeat security door sensors. Made in the U.S., our Balanced Magnetic Switches (BMS) and Triple Bias Switches are available in all sizes and price points, from 3/8" recessed to heavy duty surface mount, including UL certified Std 634 Level I and Level II contacts

Surface Mount High Security Triple Bias
